NINJA H2SX SE FEATURES

6.5” TFT Colour Instrumentation

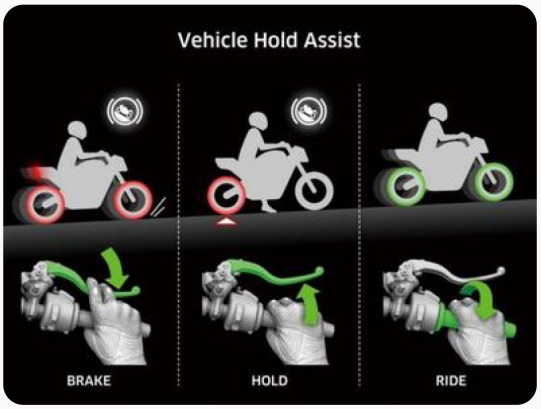
Large, easy-to-read 6.5” full-colour TFT instrumentation adds a high-tech touch to the cockpit. Complementing the multiple display modes and smartphone connectivity, compatibility with Kawasaki SPIN offers numerous infotainment possibilities.

Tyre Pressure Monitoring System (TPMS)

TPMS continuously monitors tyre air pressure while riding, adding to rider reassurance on long tours.

ACC (Adaptive Cruise Control)

A more advanced version of Electronic Cruise Control, ACC maintains the speed set by the rider, but adjusts the vehicle speed to maintain a suitable following distance from the vehicle in front.

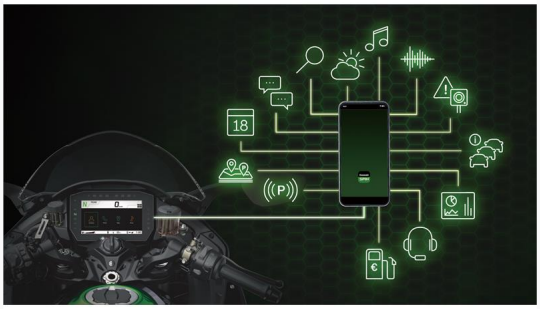


Vehicle Hold Assist (VHA)

Activated when the rider has stopped and firmly applies the brake(s), VHA engages the rear brake to allow the rider to relax their brake hand/foot

Kawasaki SPIN

Kawasaki’s new smartphone-based infotainment app enables various third-party applications to be downloaded and displayed on the cockpit’s TFT display.

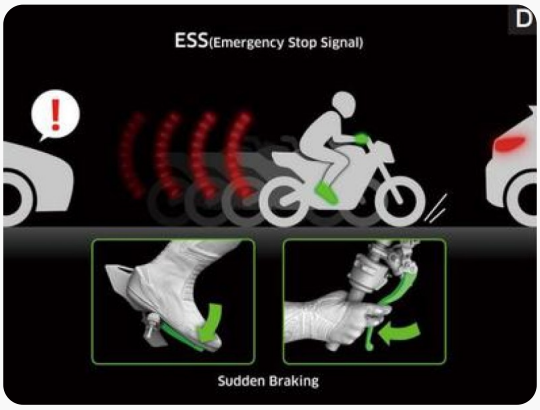


BSD (Blind-Spot Detection)

The rear-facing radar sensor monitors the bike’s surroundings and alerts the rider to presence of a vehicle approaching in the rider’s blind spot.

FCW (Forward Collision Warning)

When the system determines that continuing at the current speed may result in a collision with the vehicle in front, it warns the rider



Emergency Stop Signal (ESS)

During hard braking, ESS causes the brake light to flash, calling attention to the bike’s quick deceleration.

KECS with Skyhook (SE)

KECS, Kawasaki’s semi-active electronic suspension system, adapts to road and riding conditions in real time, providing the ideal amount of damping called for. Updated software incorporates Skyhook technology to deliver an even more composed ride, contributing to increased comfort and enjoyment
