790 ADVENTURE FEATURES

ENGINE

The 2023 KTM 790 ADVENTURE is powered by an improved EURO5 790 cc parallel-twin compared to its predecessor. A reworked clutch with better lubrication and new clutch discs makes for smoother shifting, while a 20% increase in crankshaft weight helps smoothen the ride even more. An additional knocking control system also means fewer worries when filling up with poorer grade fuel in far away places.

FRAME

The overall geometry of the KTM 790 ADVENTURE was developed for light handling, and comfort on long-distance exploration missions - with unchallenged offroad capability. Strength was a big consideration in the design, so a tubular Chromoly steel frame is used with the engine acting as a stressed member to reduce weight and overall size. An all-new engine protector also adds a little more piece of mind when out of the trail. All design and engineering innovations are focused on being compact and

ERGONOMICS

With tank spoilers and rear side panels slightly wider than the seat, hitting the long road to nowhere is easier thanks to improved rider movement. This also helps with reduced wear and tear on the seat, while the slim shape of the fuel tank is optimized for precise handling and control when standing on the pegs.

UPGRADED TFT DASH

A new state-of-the-art full 5" TFT display keeps you informed with everything you need to know about the machine below you. Featuring improved functionality, each function is illustrated by an infographic of the motorcycle to directly show the user the relevant field of adjustment. An optically bonded mineral glass display ensures optimum scratch and glare resistance. Additionally, an optional Connectivity Unit allows the connection between the KTMconnect app and the TFT via Bluetooth for Turn-b

OFFROAD ABS

For the 2023 KTM 790 ADVENTURE, Offroad ABS is automatically toggled when you've selected Offroad or optional Rally Mode. This means ABS functionality is reduced on the front wheel, and completely deactivated on the rear, allowing riders to slide the back-end into a corner. Simply put - more braking power and control in the dirt when you need it, with the ability to shred the trail when you don't.

RIDER AIDS

KTM rider aids are developed to enhance the overall ADVENTURE experience by providing more control in different riding scenarios. ABS, MTC, and specially engineered RIDE MODES allow you to get the most out of your machine when barreling down the tarmac on your way to the rough stuff.
