890 ADVENTURE FEATURES

REWORKED SUSPENSION

The 2023 KTM 890 ADVENTURE allows you to set up your ride to your own preferences. Fitted with rebound and compression damping adjusters on the top cap of each fork leg, it makes for quick and easy adjustment for different terrain types. On the rear, the shock features a rebound damping adjuster and a hand adjuster for spring preload. The rebound damping adjustability allows the rider to adapt the shock behavior to different riding situations, while the spring preload adjuster can be tailored for

TYRES

The 2023 KTM 890 ADVENTURE is fitted with all-new Pirelli Scorpion Rally STR rubber, specifically optimized for KTM. These are ideal for riders looking for durability, handling, and mileage on road, but with the added benefit of being able to conquer difficult offroad tracks and trails with ease.

FRAME

The overall geometry of the KTM 890 ADVENTURE was developed for light handling, and comfort on long-distance exploration missions - with unchallenged offroad capability. Strength was a big consideration in the design, so a tubular Chromoly steel frame is used with the engine acting as a stressed member to reduce weight and overall size. An all-new engine protector also adds a little more piece of mind when out of the trail. All design and engineering innovations are focused on being compact and

UPGRADED TFT DISPLAY

A new state-of-the-art full 5" TFT display keeps you informed with everything you need to know about the machine below you. Featuring improved functionality, each function is illustrated by an infographic of the motorcycle to directly show the user the relevant field of adjustment. An optically bonded mineral glass display ensures optimum scratch and glare resistance. Additionally, an optional Connectivity Unit allows the connection between the KTMconnect app and the TFT via Bluetooth for Turn-b

STABILITY

The 2023 KTM 890 ADVENTURE is rock solid at any speed, thanks to a high-end steering damper. Engineered to provide unflappable composure at all times, the steering damper works to keep the front end stable when flicking through tight turns, or hauling over corrugated surfaces.

OFFROAD ABS

For the 2023 KTM 890 ADVENTURE, Offroad ABS is automatically toggled when you've selected Offroad or Rally Mode. This means ABS functionality is reduced on the front wheel, and completely deactivated on the rear, allowing riders to slide the back-end into a corner. Simply put - more braking power and control in the dirt when you need it, with the ability to shred the trail when you don't.
