Z H2 FEATURES

Electronic Cruise Control

Kawasaki’s cruise control system allows a desired speed to be maintained with the simple press of a button. Once activated, the rider does not have to constantly apply the throttle. This reduces stress on the right hand when travelling long distances, enabling relaxed cruising and contributing to a high level of riding comfort. Operation of the Electronic Cruise Control is conveniently activated from the left handle.

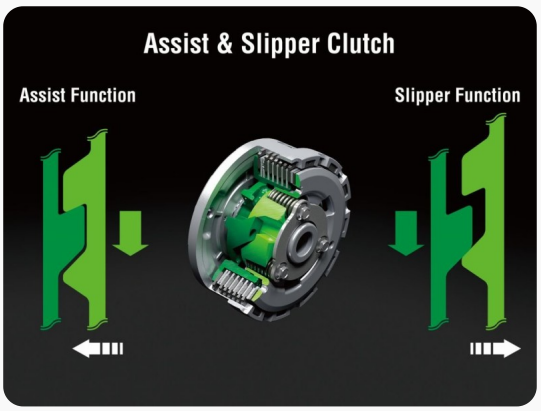

Brake System

To be easy to ride at low and medium speeds, as well as high speeds, the Z H2 needed a brake system that matches its performance. The front brakes are gripped by Brembo M4.32 monobloc calipers. Machined from cast aluminium blocks, their highly rigid one-piece structures boast strong braking force. The calipers are radially mounted, further contributing to their high performance. The Nissin master cylinder, fine-tuned with Kawasaki original settings, offers functionality perfectly matched to t

Assist & Slipper Clutch

The assist cam reduces the clutch spring load for lighter clutch lever operation, which helps reduce rider fatigue in city riding situations like stop & go traffic or traffic jams. The slipper clutch relieves pressure from back-torque to help prevent the rear tyre from hopping and skidding when downshifting.

Full-Colour TFT LCD screen

The instrument panel comprehensively displays various information on the full-colour TFT LCD screen. It also has functions that can help you manage daily vehicle operating status and schedule for long distance riding. Display functions include a digital speedometer, gear position indicator, shift indicator, odometer, dual trip meters, fuel gauge, remaining range, current/average fuel consumption, outside temperature, coolant temperature, clock, Economical Riding Indicator, IMU indicator, KIBS in
