Give every ride the potential to be exhilarating, RKR features an advanced Liquid Cooled 125 power unit that produces 12.6 bhp thanks to its Single Cylinder Multi Spark-Multi Valve Technology. Race inspired design is the lifeblood that flows through RKR, a focused vision of performance and style brought to life, with the DNA of Benelli infused from blueprint to production, a bike that truly reflects the passion of the track in a road going 125, feel the echoes of 100 years of design experience through the controls as you smile through the miles. As a result of the partnership with fabled Italian Manufacturer Benelli, RKR benefits from the latest in Multi Valve, Multi Spark engine BMT technology to achieve higher fuel efficiency. ?Lean combustion without sacrificing power is achieved by mixing fuel and air above the theoretical air-fuel ratio (14.7:1). But too lean a fuel and air mixture is not an easy task to ignite. The BMT power platform adopts a higher compression ratio, and the temperature of the mixture is higher and easier to ignite when the piston reaches the top dead centre, literally more Bang for your Buck!
